Our vision

is to bring transgender health care from the margins to the mainstream.

Our Mission is to provide comprehensive, affirming medical, surgical and mental health care services to transgender and gender-nonconforming people and their families.

We value evidence-based, culturally competent care for pediatric and adult patients with diverse gender identities.

We commit to training for health care providers, community outreach, advocacy and community based research.

Transgender Health Services

The Gender Wellness Center at Susquehanna Family Practice offers services designed to meet the needs of transgender and gender-nonconforming patients. Our caring and professional staff follow the Standards of Care from the World Professional Association for Transgender Health.

Our Services Include:

- Primary care for all ages
- Gender-affirming and trans-specific gynecologic care
- Evaluation and treatment of transgender and gender-nonconforming youth, including pubertal blockers and hormone therapy
- Evaluation and treatment of adults, including hormone therapy
- On site mental health services, including gender assessments, psychotherapy, family therapy and group therapy
- Collaborative care with off-site mental health providers
- Gender-affirming surgeries, including breast augmentation, chest reconstruction, hysterectomy, orchiectomy and tracheal shave
- Referrals for gender-affirming surgeries locally, nationally and internationally
- Referral to voice therapists
- Referrals to local and regional support groups
- Preoperative and postoperative care for gender-affirming surgeries
- Training for schools and community organizations
- Training and mentoring for health care professionals providing services to transgender patients

Frequently Asked Questions

What can I expect when I call?

A receptionist will take your information and one of our staff will contact you by phone to connect you with the provider who will best meet your needs.

What is gender dysphoria and how is it managed?

Gender dysphoria refers to discomfort or distress that is caused by a discrepancy between a person's gender identity and that person's sex assigned at birth. There is great diversity within the transgender community, not all individuals experience dysphoria. Management for transgender people is individualized and may involve hormone therapy, pubertal blockers, surgery and psychotherapy.

How will I know which medical and non-medical options are right for me?

Our providers will work with you to explore your unique gender identity and help you choose options that meet your individual needs.

How can I get assistance if I have no insurance?

Please contact a member of our staff to discuss your situation. We will work with you to accommodate your needs.
