The reality is that access to competent, quality care for transgender people is limited. But that doesn’t mean that as a transgender person, you have to settle for second-rate care!

At Chase Brexton, we provide trans-specific and affirming health care services for trans women, trans men, gender nonconforming, genderqueer, and all other individuals who have health care needs that are often overlooked by conventional health care organizations.

MORE ABOUT OUR SERVICES

Primary Care
Our primary medical care providers are trained to offer health care services specific to the needs of transgender people and to prescribe hormone therapy, as appropriate. However, you must be a medical patient to be prescribed hormone therapy.

We offer services such as STI (sexually transmitted infection) screenings, post-surgical check-ups, smoking cessation, trans-friendly specialist referrals, and assistance with conditions such as diabetes, asthma, hypertension, etc.

Behavioral Health
We provide trans-sensitive and trans-specific services that facilitate the patient's exploration of their identity and that assist in their transition. We offer individual and group therapy, couples counseling, and support groups (including our 5-week therapy program, “Transcendence: Pathways to a Healthy Transition”).

Our services also include the Child, Adolescent, and Family (CAF) Behavioral Health program at Chase Brexton, which offers clinicians who are specially trained to support the whole family and are experts in behavioral health for children, adolescents, and families.

SAGECAP
Through a partnership between the LGBT Health Resource Center of Chase Brexton and SAGE (Services and Advocacy for GLBT Elders), the SAGE CAP (Caring & Preparing) program supports informal, unpaid caregivers who identify as LGBT themselves and/or care for someone who is LGBT. SAGECAP offers:
- Support groups for caregivers
- One-on-one counseling
- Information and referrals
- Financial, legal, and medical assistance
- Education and training

Call for your appointment today and find out why thousands of Marylanders make Chase Brexton Health Care their health care home!

“For me, it was important to have a doctor who understood my transgenderism. At Chase Brexton, I've found doctors who listen to me and who have my health at heart.” - Kathy

Whether you are looking to begin hormone treatment, taking the initial steps toward gender-affirming surgery, or you are just searching for primary care services that are more sensitive to you as a transgender individual, Chase Brexton can help.

We specialize in transgender care including:
- Primary Medical Care
- Gynecological
- Individual and Group Therapy - including for Children, Adolescents, and Families (our CAF program)
- Addictions Services
- Full-Service Pharmacy & Medication Management
- Dental
- Case Management
- Legal assistance for gender/name changes

Our providers adhere generally to the World Professional Association for Transgender Health (WPATH) Standards of Care (formerly known as the Harry Benjamin Standards of Care).
