

Screenshot of how one organization's EHR collects Sexual Orientation data

The screenshot displays the 'Question Administration' window. At the top, the 'Category' is '(None Selected)', 'Battery' is 'Outcomes - ASI', and 'Assessments' is 'ASI'. Below this is a table of 'Assessment Questions' with the following data:

No.	Question	Scale	Weight	Route
3	A3. Interview Date:	Date	0	
4	G1. Gender:	Gender ASI	0	
5	G1a. Sexual Orientation:	Sexual orientation ASI	0	
6	G1b. Do you currently identify with a gender that differs from the biological sex shown on	Text (Greater Than 256	0	
7	G2. Special:	Interview Special	0	
8	G3. Race:	Race	0	

The 'G1a. Sexual Orientation:' question is selected, and its configuration is shown below. The 'Response Scale' is 'Multiple Choice' and the 'Response' is 'Sexual orientation ASI'. The 'Question' field contains 'G1a. Sexual Orientation:'. The 'Response Items' table is expanded, showing the following data:

Response	Value	Description	Route
Straight	0		Non
Lesbian or Gay	0		Non
Bisexual	0		Non
Other	0		Non
Client doesn't know	0		Non
Client refused	0		Non

At the bottom of the window, there are buttons for 'Add New Question', 'Edit Existing Question', 'Edit Question List', 'Delete Question', 'Save', and 'Cancel'. The 'Allow Comment' and 'Required To Administer Assessments' checkboxes are checked.
