UK HealthCare Inclusive Policies

Visitation Policy

UK HealthCare has an inclusive visitation policy. We do not restrict or deny visitation on the basis of race, color, national origin, religion, sex, gender identity, sexual orientation or disability.

Medical Decision-Making

We recommend that all patients have an advance directive, which includes appointing a health care surrogate (someone who knows your wishes and can speak for you). We respect your choice of health care surrogate regardless of sexual orientation or gender identity.

Inclusive Restrooms

We incorporate inclusive restroom spaces throughout our medical and academic campuses. These restrooms are often single-stall lockable units that provide safe and respectful facilities for

everyone. For an updated list of these inclusive restrooms, visit the Office of LGBTQ* Resources' database at www.uky.edu/diversity/lgbtq.

Transgender Needs

UK HealthCare offers multiple services to meet the needs of transgender patients. These services include trans-affirming gynecological care, hormone therapy and monitoring, and psychological or psychiatric evaluations.

We're here for everyone.

UK HealthCare seeks to provide high-quality health care to all patients, regardless of age, race, ethnicity, culture, color, national origin, language, sex, gender identity or expression, sexual orientation, appearance, socio-economic status, physical or mental disability, religion, or diagnosis.
